1. **Software buildout**
   a. Software would be built with .Net Core in C#
   b. Would be recreated on the web with HTML5, JavaScript with current standards
   c. Hosted on a Windows IIS server
   d. Backend database would be SQL Server 2016
   e. Make the system multi-tenanted with the ability for clubs / dog owners to log in and view reports and history

2. **Migration**
   a. Recreate all input tabs
   b. Recreate existing reports
   c. Migrate all existing data into SQL Server
   d. Use SQL stored procedures to increase performance of the application

3. **Pricing / Timeframe**
   a. From start to finish the buildout should take 1 to 3 months.
   b. $10,000 cost for buildout including 2 months of support after project completion

4. **Support**
   a. 8am to 5pm Monday to Friday support
   b. Respond to emails within 24 hours on weekdays and 48 hours on weekends
   c. Monthly support cost $385
   d. Covers
      i. Maintenance and daily backups *(if hosted on Azure)*
      ii. Software Patches
      iii. Software training / documentation

5. **Additional Work**
   a. Any additional work outside of support and buildout will be billed
      i. $150 / hour or
      ii. Per project with proposal

6. **Hosting**
   a. Local server in USCA location
      i. Maintenance will be handled by Computer St. Louis for this server
   b. Microsoft Azure
      i. Maintenance is handled by Webenology, LLC
      ii. Non-profits get $3,500 a year in credits that is perpetual as long as the non-profit exists which would essentially make all the hosting free

1. Current setup would only require a max of $200 a month for the hosting of the VM
            iii. Virtual VM running SQL 2016
7. **References**
    a. MFHC (Kimberly Tones)
        i. 573-636-4060
    b. Informanix Technology Group (Kyle Molotkin)
        i. 1-204-289-3045
    c. Computer St. Louis (Seth Russel)
        i. 314-394-4010
