

USCA Database Proposal Information

By Vadim Plotsker, USCA President & Heidi Theis, USCA National Breed Warden

Vadim has recently received news that the SV board has voted to recognize our pedigrees and studbook of German Shepherd Dogs that are bred in accordance with WUSV breed harmonization. At this time, we need to upgrade our database and studbook.

Heidi has been in discussion with Chris Mandela of www.GSDeventsonline.com about the use of her already established database for USCA's use. For those of you who do not know about Chris and her site, she currently has on-line entries for USCA trials, shows, breed surveys and many clubs are using her services at a discounted rate negotiated by Heidi for USCA clubs over GSDCA or Canadian clubs. Her system is completely interactive and already has a lot of content. Per Chris, she has 41,509 dogs, results for 275 shows from 2000-2020, results for 775 trials from 2015-202, and results from 56 breed surveys from 2017-2020.

Over the past several months, Chris has created a pedigree template, a breed survey template, as well as having edited her current show cards, show catalogs, trial scoresheets, etc., based on judge and user input. She is easy to work with and she is highly motivated. She was hired for and processed the entries for our 2019 USCA Sieger Show and Nationals. It is so simple to use and such a time saver that she was also hired to process 2020 National Show and Nationals before they were cancelled for covid. It is the automated system USCA has desperately needed.

Chris has created a schematic that any programmer would understand on how her system works if anything were to ever happen to her. She will provide this document to USCA and will designate an individual she trusts to release her username/password to USCA in the event of her untimely death, so USCA is not left without a database.

For comparison for fees, for our national events, if she processes them separately from her proposed fees, they run approximately \$4,000/year. She is including processing these national events in her fee structure. Her fee structure is simple at a flat monthly rate and she is willing to re-negotiate a possibly lower rate with USCA, if/when Vadim introduces other WUSV country users to her system. For her system, she would provide the following to USCA for a flat monthly rate of \$650, which is already very discounted.

1. Online USCA Pedigree Generation/Printing
2. Online USCA Breed Survey Generation/Printing
3. Online litter registration form
4. Discount for use of online entry forms & related document generation for USCA clubs
5. Include link from www.gsdeventsonline.com directly to USCA website Members Only Login
6. Provide a series of USCA Only website pages that tie directly into information contained in GSD Events Online and information collected by USCA. Information can be like content provided in SV-Doxs, the SV database
7. Variety of statistics
8. Provide USCA free use of online entry forms for all National events

USCA Registration proposed fee schedule

Bescheinigung/Deckbescheinigung from SV - \$100 (same)

A stamp - \$100 (same)

A stamp with LUW - \$115 (same)

A stamp elbows - \$70 (same)

OCD - \$58 (same)

A stamp protest - \$100 (same)

Individual dog registration (import or AKC registered dog) – \$35 (same) – **proposing free individual dog registration for first year to generate interest in the newly updated pedigree service.**

Dual USCA/SV registration – \$104

Litter registration – \$20 + \$5/puppy (same) – **proposing free litter registrations for qualifying litters, for the first year to generate interest for breeders to use the service. This would be for qualifying litters only, where all USCA breeding regulations have been followed, as set forth in our breeding regulations.**

Dual USCA/SV registration – \$52/puppy (same)

Export Pedigree – \$75

SV breed survey (new or lifetime) – \$100 (same)

USCA breed survey – \$25 (same)

SV DNA - \$175 (same)

USCA DNA – Heidi to research

Replacement dual USCA/SV pedigree – \$71.50 (same)

Replacement USCA pedigree – \$15

Replacement USCA breed survey – \$15

SV or USCA Character Assessment Test fee – \$75

SV or USCA Character Assessment Test penalty fee for dogs over 13 months – \$175

Kennel Registration fee – \$30 – **Proposing free kennel registrations for this first year to generate interest**

USCA member Database yearly membership login: \$75/year – **proposing free for all USCA members for first year**

Non-USCA member database yearly membership login: \$225/year (encourages them to join USCA)

USCA Integration with GSD Events Online Database

Outline for an ongoing partnership with the USCA and Christine Mandela and her database GSD Events Online. The following would be provided to USCA for a flat fee of \$650 per month.

1. Online USCA Pedigree Generation/Printing
 - a. Includes saving all entered information in separate file
 - b. Admin screen for office personnel to use to generate/manage pedigrees
 - c. Pulls available information from database with form to complete information
 - d. Includes barcode for microchip number
 - e. Linebreeding code being finished
 - f. Can be linked into a Litter registration system to get # in Litter and Littermate information in the future
2. Online USCA Breed Survey Generation/Printing
 - a. Includes saving all entered information in separate file
 - b. Admin screen for office personnel to use to generate/manage pedigrees
 - c. Pulls available information from database with form to complete information
 - d. Includes barcode for microchip number
3. Online litter registration form
 - a. Creation of online litter registration form
 - b. Auto fills available existing information from database
 - c. Includes saving all entered information in separate file
 - d. Admin screen for office personnel to manage information
 - e. Generates litter registration document to save as .pdf or print
 - f. Can email document to litter owners
4. Discount for use of online entry forms & related document generation for USCA clubs
5. Include link from GSD Events Online (www.gsdeventsonline.com) directly to USCA website Members Only Login
6. Provide a series of USCA Only website pages that tie directly into information contained in GSD Events Online and information collected by USCA. Information can be similar to content provided in SV-Doxs
 - a. Links to pages can only be accessed from USCA Members Only section
7. USCA Only pages can start with but are not limited to:
 - a. Online results for Conformation Shows
 - i. Includes table to find & select an event
 - ii. Same format as results displayed for 2019 USCA Sieger Show
 - iii. Include dogs for all classes including Puppy classes
 - iv. Include all dogs entered in catalog even those not presented in the ring
 - v. Include additional information such as height & chest measurements and dental notation information when available.
 - vi. By including all dogs provides way to generate accurate statistics
 - b. Online results for Trials
 - i. Includes table to find & select an event
 - ii. Consistent format
 - iii. Include sex of entered dogs so that awards for Males & Females could be awarded
 - c. Online results for Breed Surveys
 - i. Includes table to find & select an event
 - d. GSD Events online would do all data entry with results provided by USCA
 - e. Bloodlines page
 - f. Litter Information

- i. Shows number in litter, sire, dam and track information going forward on litter mates such as:
 - 1. Registration #'s, microchip, hip/elbow ratings, show ratings etc.
- ii. Off shoot would be page of breeding information for sires and dams to show number of litters

8. Variety of statistics

- a. Implement points for conformation show placements with recognition at end of year for those with highest points
- b. For conformation shows:
 - i. Total entries by region
 - ii. Total entries by class
 - iii. Total entries by placement
- c. For Trials
 - i. Total entries by region
 - ii. Total entries by title
 - iii. Total entries by title by placement
 - iv. Number of trials held by judge
 - v. Number of entries by judge
- d. Other stats required by USCA Office

9. Provide USCA free use of online entry forms for all National events

- a. Includes show cards, catalog pages, trial forms and any other event paperwork

Transfer of Access to Online Web hosting for GSD Events Online

This document provides that should Christine Mandela pass away or be unable to physically fulfill her duties at providing database support and IT consulting to the United Schutzhund Clubs of America (USCA), the following is agreed to:

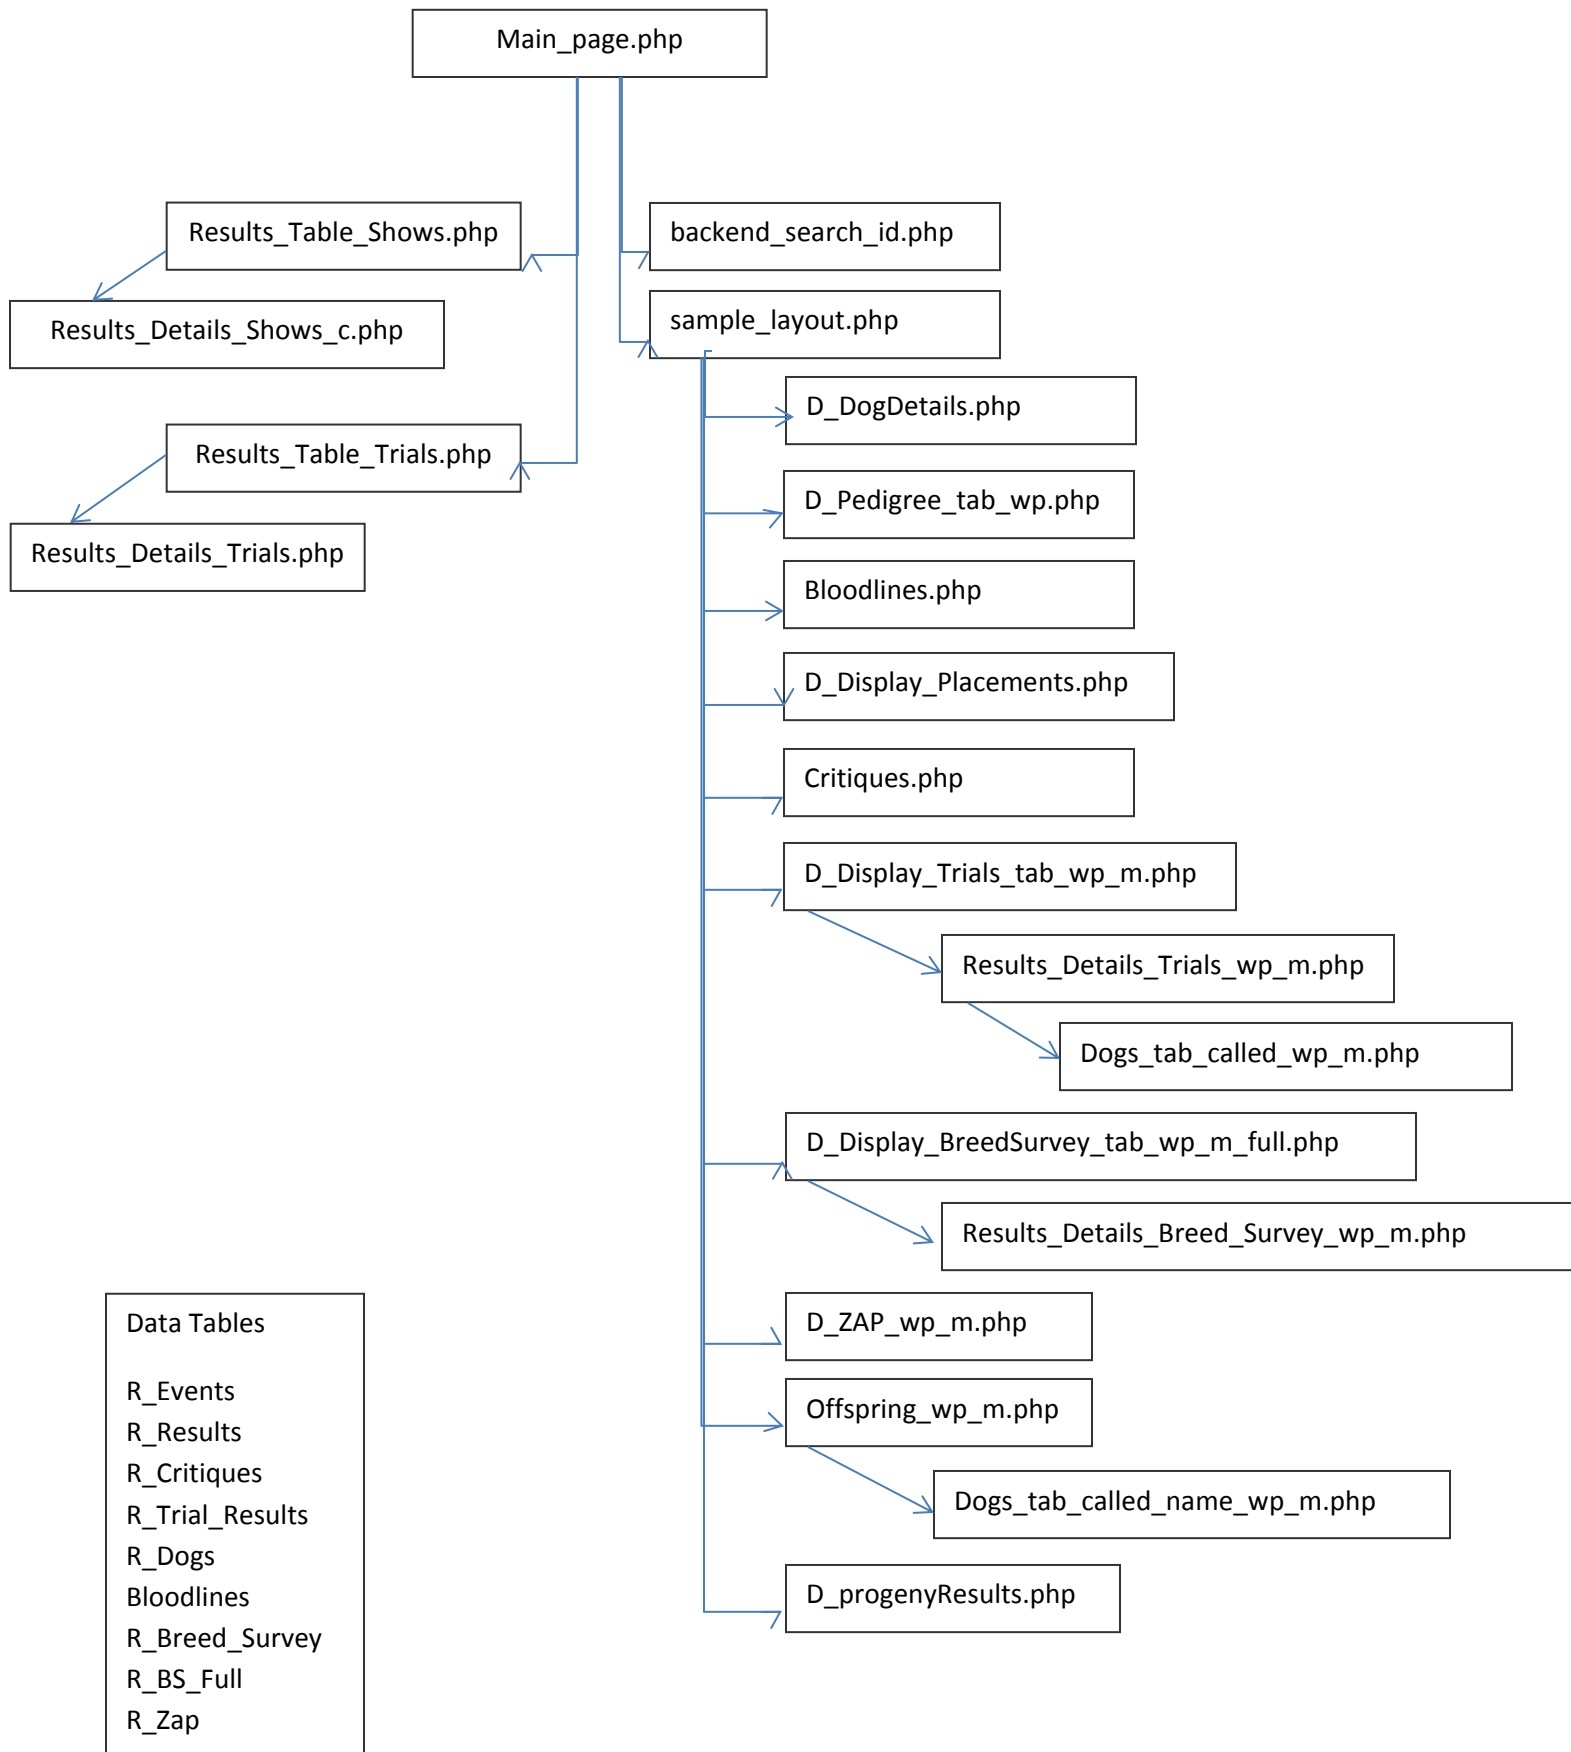

- USCA will be provided the username and password to Christine Mandela's web hosting account at www.inmotionhosting.com. This will provide access to all code and database information used not only for the USCA but for the website www.gsdeventsonline.com.
- USCA will be granted not only access/ownership to all content, but also the domain www.gsdeventsonline.com
- The following persons will have a copy of this authorization document and also the username and password to the account.
 - Gayle Kirkwood – 282 Shephard Road, Gibsonia PA 15044 gckirkwood@aol.com (412) 480-7307
 - Debbie Rich – 4111 Pershing Ave, Cleveland OH 44134 (440) 887-1880
- Information will be provided to the Office of United Schutzhund Clubs of America
 - www.germanshepherddog.com
 - 19 Fox Valley Ctr, Arnold MO 63010 (314) 200-3193

Since 1899 the German Shepherd Dog has been bred through selection to what it is today - the most versatile dog worldwide. This popularity has been achieved through this dog's unique capabilities and society's need for all kinds of canine usage. All over the world German Shepherd Dog breeders work through selective breeding programs to accomplish the objective of the standard set by the breed's founders in Germany. Most German Shepherd Dog clubs have adopted this standard and the breeding rules from the German Shepherd Dog Club of Germany (SV), the parent club of the breed.

Since its formation, the United Schutzhund Clubs of America (USCA) has adopted all these rules and calls itself the guardian of the true German Shepherd Dog in the United States of America. USCA is a member of the World Union for German Shepherd Dogs (WUSV) and its members represent the United States every year in the World Championship for German Shepherd Dogs in different countries all over the world. The United Schutzhund Clubs of America is structured throughout regions and local clubs within the United States and offers Working Dog Trials, Conformation Shows and Breed Surveys for its membership. The United Schutzhund clubs of America is strongly devoted to fulfilling the goal of the founders of the breed.

Upon entry into the USCA Breed Registry, the dog's ancestry is confirmed. The Breed Book is the basis for controlling the breeding of German Shepherd Dogs. In order to provide the complete inborn genetic characteristics of all the descendants within the breed, the Breed Book shall list all animals eligible for entry in compliance with the Breeding Rules even if it should later emerge that some of these animals may for certain reasons not be suitable for breeding. Since it is essential for obtaining comprehensive data within the breed on the certificates of authenticity and are only of value as an addition to the AKC registration.

The pedigree remains the property of United Schutzhund Clubs of America.

German Shepherd Dog breeding is working dog breeding and shall always be working dog breeding otherwise it is not a German Shepherd Dog breeding.

Breed Survey Report (attachment to the pedigree)

For the German Shepherd Dog: **Alta-Tollhaus Icon, A 02082 DN37589501**

Period: **2020-2021**

Sex: **Male** Date of Birth: **September 07, 2013** Hip Rating: **OFA Good**
Elbow Rating: **a normal**

Color and Markings: **Black/Red**
Titles: **IGP3**

Microchip/Tattoo:

985112004392104

Breeder: **Julie Richards, , Marshall, MI 49068 United States**

Owner: **Jody Huber, , Pittsburgh, PA 15237 United States**

Assessments on the day of the original survey:

I. Generalities:

| | | | |
|-------------------------|----------|---------------|----------------|
| a) Height at withers: | 65.00 cm | e) Pigment: | good |
| b) Chest Depth: | 29.00 cm | f) Coat: | normal |
| c) Chest circumference: | 78.00 cm | g) Testicles: | well developed |
| d) Weight: | 32.00 kg | | |

II. Evaluation of general condition, size, overall structure, firmness of ligaments, gait, instinctive behaviour, self-confidence and ability to cope with stress.

Large, strong, dry and firm, with good pigmentation, in correct proportions developed male. Masculine head, high withers, straight back, croup is in good position, but should be slightly longer. Balanced chest proportions, straight front, good angulations in front and rear. Straight coming and going, ground covering gait with strong rear thrust and good front reach. Good Character. TSB Pronounced, outs.

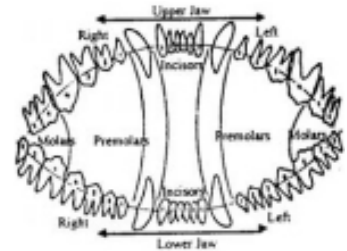

III. Temperament, nerves, gun sureness, instinctive behavior, self-confidence and ability to cope with stress:

| | |
|---|-------------------------|
| a) Character/Temperament: | steady |
| b) Alertness/Attentiveness: | present |
| c) Condition of nerves: | steady |
| d) Sureness: | present |
| e) Gun sureness: | present |
| f) Instinctive behavior, self-confidence and ability to cope with stress: | pronounced-does release |

IV. Assessment while standing and while in motion:

| | |
|--|-------------------------|
| a) Secondary Sex Characteristics: | pronounced |
| b) Constitution: | robust |
| c) Expression: | lively |
| d) Structural Characteristics: | normal proportions |
| e) Bones: | strong |
| f) Musculature: | well developed/powerful |
| g) Firmness of front ligaments while standing: | very good |

h) Firmness of rear ligaments while standing: very good
i) Back: firm
j) Tightness of elbows: very good
k) Firmness of pasterns: good
l) Front view: straight
m) Croup: somewhat short
n) Firmness of hocks: good
o) Gait: front/rear correct straight gait
p) Front reach: good
q) Rear drive: effective
r) Nails: dark
s) Feet: front-rear tight
t) Head: very strong
u) Eye color: dark
v) Upper jaw: well developed
w) Lower jaw: powerful
x) Dentition: healthy
y) Dentition faults:

V. Special Attributes/Shortcomings:
